Subject: RE: Ecology Comments - Beaver Related Maintenance on WDFW Lands (B. Zeigler)

Cindy,

Thank you for your comment on the Determination of Nonsignificance regarding the proposal to conduct beaver related maintenance of drainage facilities.

In your comment Ecology expressed concern about burning of plant materials and complying with air quality rules. Just to be clear, we have no plans to burn any materials in association with beaver-related maintenance. As described in the checklist, such material will be repositioned in the system, be placed along the bank, or be removed from the site.

Thank you.
